

AMENDMENTS

In the Specification

Please amend the paragraph beginning on page 4, line 29 as follows, with the language that is underlined (“ ”) being added and the language that contains strikethrough (“~~—~~”) being deleted:

Figure 1 is a block diagram showing a prior art application of a job ticket service. Job tickets are often associated with a printing standard, the job definition format (JDF). The JDF is described in detail in JDF Specification Draft Spiral 4.0, available ~~at www.~~ on the World Wide Web at URL hp_opensource.com, which is hereby incorporated by reference. In Figure 1, a user 1 generates a job request and sends the job request through a portal 4 to a processor 5. The job request may include a job ticket data file 2 and a content file 3. The user 1 may be a computer terminal in a networked computer system and the processor 5 may be a networked printer. The job request may involve printing a document. The document may be represented by the content 3, which is a digital representation of text and images to be printed. The intended format of the printed document may be described in the job ticket file 2, which is simply a digital file that specifies how the printer is to print the document. For example, the job ticket 2 may require that the document be printed on back-to-back pages.
